

SUMMARY

Shiran Gora is a computer science engineering student at KD Technological University who has been involved in machine learning, deep learning, full stack, and cybersecurity projects, including a power grid ML system, a healthcare image classification model, and a resume builder app. He has completed a second year program with a 96% score in his 10th grade Karnataka board, finished an internship at IIT Roper as a developer, and has participated in multiple software and hardware hackathons, showcasing strong leadership and a keen interest in data driven model development.

EDUCATION

KLE Technological University, Hubli 2024 – 2028

B.E. in Computer Science & Engineering CGPA: 9.80 (up to 3rd Sem) | 10/10 SGPA in 3rd Sem

Karnataka State Board 2022 – 2024

Class XII (PUC) Percentage: 96.50%

SKILLS

Languages: C, C++, Java, Python, JavaScript

Frontend: HTML, CSS, React.js

Backend / Databases: Node.js, Express.js, MongoDB, MySQL, Firebase, SQL

Hardware & IoT: Arduino UNO, IR Sensors, Motor Drivers, Mechanical Systems

Tools & APIs: Git, GitHub, REST APIs, Razorpay, Hugging Face Models, Geolocation APIs

Assessed Topics: General Programming

Programs Enrolled: AI/ML Engineering, Cloud & DevOps

ACHIEVEMENTS

- Scored 10/10 SGPA in 3rd Semester; felicitated at the college annual function for outstanding academic performance.
- 2nd Prize — Technivex Hackathon (Software + Hardware Integrated IoT Hackathon), KLE Hubli, as Software Lead.
- 1st Prize — SDM Dharwad Robotics Competition (Line Following Robot).
- 2nd Runner-Up (NEI Prize) — NEI Mysore Robotics Competition (Line Following Robot).
- Top 3 Ranking — Tech X Hunt Coding Competition conducted by Code Club, KLETU Hubli.
- Team Lead — Coderush Hackathon 2025, GM Institute of Technology; built MERN-based Aarohi agriculture platform.
- Team Lead — PUPA 2026, KLE Tech University; led team 'Status Code 200' to deploy Akshay Smart Canteen live.

STRENGTHS

- Can define a variable and explain that it stores a value.
- Recognizes that local variables are limited to a function or block scope.
- Understands that global variables are accessible across functions and can provide a simple code illustration.

Soft Skills: teamwork, strategic thinking, discipline, adaptability, communication

PROJECTS

SIH Mill Fault Prediction System

– Tech: ESP32, MQTT, PyTorch, Isolation Forest, Python, Current sensor, Voltage sensor, Temperature sensor, Humidity sensor, Cloud storage

– A system that gathers machine sensor data via ESP32, streams it through MQTT to the cloud, and uses an isolation■based model in PyTorch to predict equipment faults.

EXTRA-CURRICULAR

- I enjoy playing professional kabaddi, running, various games with friends, and indoor chess during my free time.
- Passionate about combining software engineering with hardware/IoT systems — actively building projects that bridge both domains.
- Regular participant in hackathons, coding competitions, and innovation challenges at university and inter-college level.
- Interests: Full-Stack Web Development, IoT & Embedded Systems, AI & Machine Learning, Competitive Coding.
